Stan,

The weekly summary looks fine. Glad to see that the turbidity issues have settled due to the new equipment.

Thank you also for the survey. I see that the near shore areas are the primarily low N20 and north. I also noticed the flow is again at almost 5000cfs, so I'd assume these low areas will continue to be addressed until the flow slows at some point?

Talk to you soon.

Mike

Subject: Re: Weekly RM 10.9 Removal Action Status Review

In preparation for this teleconference, attached are:

1. Draft minutes of last week's teleconference
2. A proposed Agenda for this teleconference
3. An updated figure showing a revised panel layout just north of the No Dredge Zone
4. Results of a recent survey of the armored area
5. A proposed status report for the www.rm109.com website

Hope you all have time to take a look before the call.
